

# Revive Turbo Cleaner & Power Restorer for Diesel Engines Installation Guide

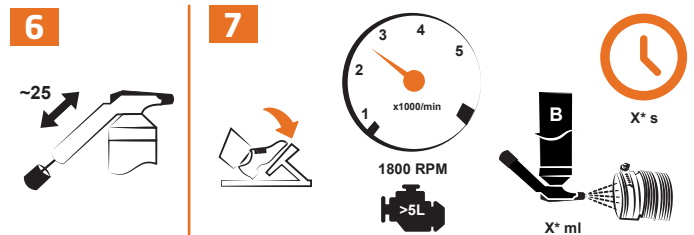

Start with a cold engine.

Locate the air intake pipe and disconnect the hose after the MAF sensor if fitted to your car.

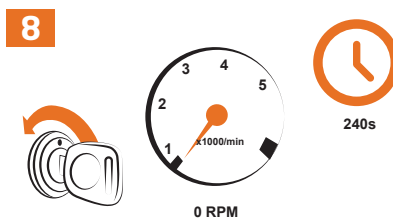

Hold the engine at 2200 to 2500 RPM while the first shot of 250ml (A) is sprayed into the air intake.

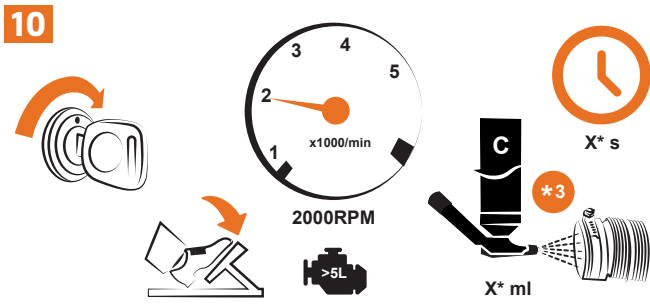

Pump the bottle 25 times.

Then apply the second 250ml (B) shot at 1800 RPM the same way.

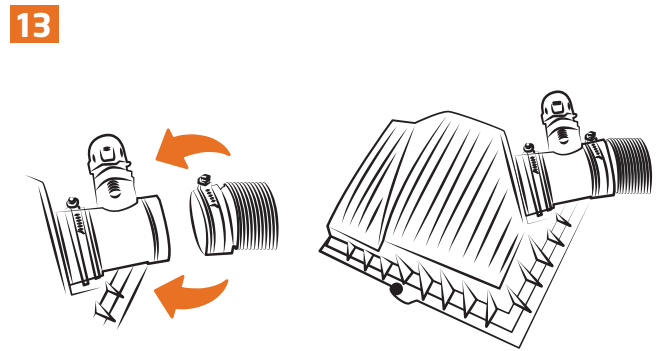

Switch the engine off and leave for 3-4 minutes while the treatment soaks in.

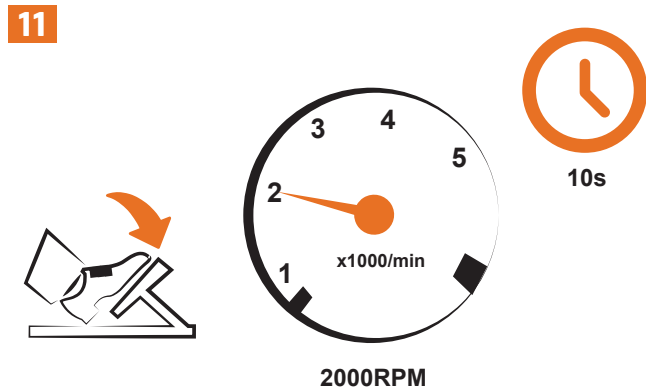

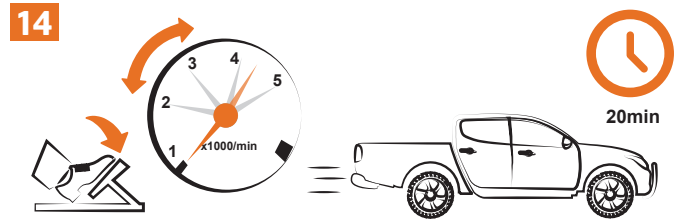

Start the engine, bring it to 2000 RPM then apply the third 250ml (C) shot into the air intake.

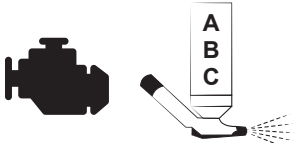

Re-attach the intake pipe.

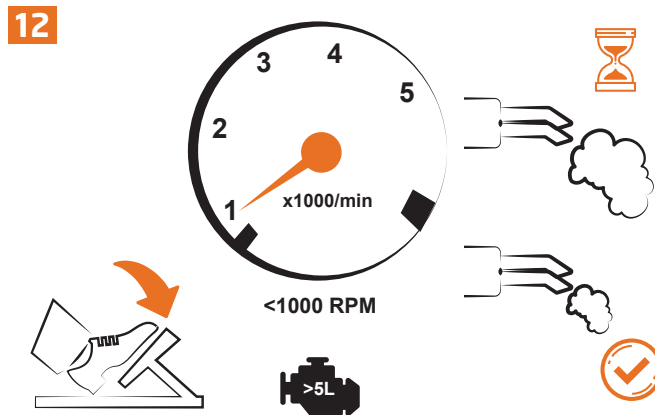

Hold the engine at 2000 RPM for 10 seconds.

Take the vehicle for a drive for approximately 20 minutes.

Engine	X*ml	X*s
0-5L	250	60
5-10L	500	120
10-15L	750	180
15L+	1000	240

Allow the engine to idle until most of the smoke has stopped.
